

COMMENT FORM

Public Scoping Meetings

We need your input. Please take a few minutes to provide your comments or questions for the USDA RUS Federal Environmental Impact Statement process and return your completed form today or mail by June 29, 2009. Your comments help in the planning and implementation of the project. **Thank you.**

Completing this form will automatically add you to our mailing list. If you prefer to not be on the mailing list, please check the box below.

☐ I do not wish to be on the project mailing list

Which meeting did you attend? CAPX2020 Plainview High School June 16, 2009

Please check the following issues that are important to you for transmission line siting.

- ☐ Project Purpose and Need
- ☒ Visual / Aesthetic resources
- ☒ Proximity to residences
- ☒ Land use (agriculture, residential, recreation)
- ☐ Water resources (floodplains, river crossings)
- ☐ Biological resources (wildlife habitat, raptors)
- ☐ Historic and cultural sites
- ☐ Radio or television interference
- ☐ Noise
- ☐ Health and safety
- ☐ Other: _____

What additional key issues should be addressed when assessing the potential impacts of this project?

Hampton • Rochester • La Crosse 345 kV Transmission Project

If you own property in one of the proposed corridors, please indicate all the existing uses of your property below:

- ☒ Agriculture ☒ Residential ☐ Conservation Easement
☐ Commercial ☐ Industrial ☐ Other: _____

Please describe any special uses or circumstances on your property that should be considered when assessing the Project. Please indicate the location of your property.

Property used for agriculture, recreation (get away)
and future residential development.

Located at ^{southeast}~~southwest~~ corner of 117th Street NW Oronoco
and Olmsted county road 31.

In your opinion, what are the most sensitive resources (biological, cultural, recreational, ect.) in the Project area and why?

The most sensible routing ~~but~~ of the two options
for the 161KV line in NW Olmsted county
would be the one which takes advantage of
the abandoned railroad right-of-way (now the
location of the Douglas Trail)

I-141-001

Your comment has been noted. The criteria used to route the transmission line is described in the Macro Corridor Study which is available on the RUS website at:
<http://www.usda.gov/rus/water/ees/eis.htm>. These criteria and routing process will be addressed in the Draft Environmental Impact Statement. The project is still in the development and planning stages and the utilities have not yet permitted a route for the transmission line.

The Draft Environmental Impact Statement will be available on the RUS website at: <http://www.usda.gov/rus/water/ees/eis.htm>. Comments on the Draft Environmental Impact Statement will be solicited after its publication.

I-141-001

In your opinion, was the project description, purpose, and need for the project adequately explained? If not, what additional information is needed?

Please tell us how to reach you.
